CLARIFICATION OF NEW TRANSFER RULE

Under the FRC transfer rule, no more than two children may transfer from the same school within a rolling 12-month period without being subject to the six-month exclusion.

An exception may apply where the children are members of the same family and live within the same household.

For the avoidance of doubt, being related alone is not sufficient. Cousins, second cousins or other relatives living in separate households cannot be grouped together to avoid the transfer restriction.

The purpose of this exception is to accommodate genuine family households, for example where a grandparent has several children living with them and is responsible for their care.
